Election/Restrictions

Claims 9-12 and 19-38 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 10/18/04.

Applicant notes that the examiner did not include Figs. 1 and 5 with group 1 and did not include the Figs. with any group. The examiner did not include Figs. 1 and 5 with the group I, Figs. 2-4 since the written description does not state that they belong together.

The written description states the following with regard to the drawings.

BRIEF DESCRIPTION OF THE DRAWINGS

Figure 1 is a perspective view of one embodiment of the food container of the present invention;

Figure 2 is a perspective view of another embodiment of the food container of the present invention;

Figure 3 is a cutaway perspective view of the food container of Figure 2;

Figure 4 is a cutaway side elevation view of the food container of Figure 2 as the same may be substantially filled with a temperature storing medium,

Figure 5 is a cutaway side elevation view of another embodiment of the food

From the above it is clear that Figs. 2-3 belong together as a group and that Figs. 1 and 5 each represent a different embodiment. Therefore the examiner has amended the groups as set forth below:

Group A, Figs. 2-4;

Group B, Fig. 6;

Group C, Figs. 7 and 8;

Group D, Figs. 9 and 11;

Group E, Fig. 1;

Group F, Fig. 5.

The examiner has reviewed the written description as well as the original claims to see if there is support for the lid belonging with Group I, Figs. 2-4. The examiner cannot find any support in the written description to include Fig. 1 or Fig. 5 with Figs. 2-4. Fig. 5 requires the lid but does not show bowl (30) as seen in Figs. 2-4. Figs. 2-4 have the bowl that is not shown or disclosed to be with Fig. 5. Since the original claims never combined the lid with the bowl, Fig. 5 is a separate group as noted above. It appears that Fig. 1 does not have the depression required in Fig. 2-4. Fig. 1 will not be included with Figs. 2-4 since the written description (as seen above) stated that Fig. 2 is another embodiment of the food container.

Therefore claims 16-18 are hereby withdrawn as being drawn to a nonelected invention. Claims 1-8 and 13-15 represent the elected embodiment of Figs. 2-4 and will be examined. Claims 9-12 and 16-38 are withdrawn and will not be examined.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 and 12-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Paquin (US 3,413,820). Regarding claim 1, see Fig. 2 where the claimed structure is shown. 23 is the temperature storing medium. 32 is the expansion area. Regarding claim 2, the opening is 33. Regarding claim 3, the cap is 34. Regarding claim 4, the location of 32 substantially prevents the temperature storing medium from entering since it is raised from 31. Regarding claims 5-7, 32 forms the support for the container. Regarding claim 8, the opening 33 is formed closely adjacent to the support 32. Regarding claim 12-15, see Fig. 2 where the depression is shown at 40, which holds the bowl 42. The depression is shaped and sized to hold food. This limitation does not require any structure that is not in the reference.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mock (US 1,771,186), Peterson (US 2,215,274), and Devlin (US 3,715,895) are all cited for teaching containers having temperature storing medium.
